

Welcome to the first edition of SIPs Industries' 'Scoop' e-newsletter where we share news and information about our award-winning construction business and introduce you to the people who help to make it so successful.

2022 IN REVIEW

Last year SIPs Industries underwent a restructure which saw **Rob Vis** become the sole Director of the business. As part of the change, a new trading name of SIPs Industries Holdings has been introduced under Delcorp Australia Pty Ltd.

We also moved the SIPs workshop to new premises in Bibra Lake at 63 Cocos Drive, where our team, along with our manufacturing and production unit, is now based.

The move last November, capped off an extremely busy end to 2022, which has put SIPs in a very strong position for the start of the new year.

STRONG OUTLOOK

We have some exciting projects underway right across Australia, including two-storey homes in Waterford and Mt Claremont in Western Australia being completed by owner builders, an architecturally designed home in South Perth, WA, a spectacular country home in regional Victoria and a farm stay cottage in Kilmore East, Victoria.

With trade and supply shortages impacting the construction industry, our customers are seeing the benefits of using a fast and efficient building method, where the product is readily available because it is manufactured here in WA.

If you would like to learn more about our environmentally responsible SIPs panels, our team is available to run lunch and learn sessions either in person, or remotely, to help you understand more about the benefits of SIPs.

CertMark International Certification

SIPs is extremely pleased to have been awarded CertMark product certification for our wall, floor and roof panels. The certification independently verifies the quality and performance of our products.

MEET THE TEAM – Aaron Boutbee

Sustainability is a big focus of SIPs' Senior Technical Draftsman, **Aaron Boutbee's** work. Having grown up in the Perth Hills, on the edge of the State forrest, Aaron takes great pride in achieving appropriate sustainability and design outcomes wherever possible.

With more than 22 years' experience in residential, civic and commercial design, Aaron boasts a Cert IV in Residential Drafting, he is an HIA Greensmart Professional and a member of Design Matters National. When he is not working, Aaron enjoys gardening, playing guitar, roller hockey and bushwalking.

MEET THE TEAM – Nishanth Tedla

We would like to introduce you to our team member **Nishanth Tedla**. Cricket-mad Nishanth is a civil engineer and his role at SIPs includes estimating, scheduling and procurement and providing technical advice on all of our projects.

Nishanth has a Master of Construction and Infrastructure Management and with four years of experience under his belt, is a very valuable part of our team. He moved to Melbourne, in 2017 after growing up in India and came to Perth this year to start work at SIPs.

Sustainable SIPs attractive option for architect

SIPs panels' sustainable qualities and extremely quick build times are the reasons West Perth architect Daniel Patterson recommends the building product to many of his clients.

One project in which he recommended SIPs panels was a beautiful home in Margaret River. To read more about Daniel's work with SIPs, click [here](#).

DID YOU KNOW?

SIPs panels offer a more streamlined, efficient building system requiring less labour and site hours, saving on labour costs, reducing waste and minimising engineering costs due to its pre-engineered components.

SIPs excellent insulation properties make the panels perfect for the hot Australian climate, delivering significant energy efficiencies. There is no need to heat or cool a SIPs build – it is thermally comfortable all year round.
