

Welcome to the latest edition of The SIPs Scoop, where we bring you news and information about our award-winning construction business and introduce you to the people who contribute to our success.

If you have any feedback or would like to find out more about SIPs Industries, our people or our products, please contact us on (08) 9494 2211.

2023 HIGHLIGHTS

The start to 2023 has been strong and we're pleased to announce the completion of SIPs fabrication for projects across Australia, including buildings in regional Victoria, Kangaroo Island and metropolitan WA.

With a strong pipeline of upcoming residential and commercial projects booked, our factory is quickly filling up and we are currently locking in orders for September onwards.

CODEMARK CERTIFICATION

Some great news for our customers – SIPs has now received independent certification from the Australian Building Codes Board for our procurement and manufacturing process.

The Codemark Certification Scheme is a voluntary third-party building product certification program that supports innovative products by providing a nationally accepted process for demonstrating compliance with the National Construction Code.

SIPs underwent the auditing process in late 2022 with certification confirmed in January this year, giving our customers confidence that our panels are high quality and produced using reliable and approved processes.

READY CUT

SIPs Ready Cut panels provide a simple, fast and cost-effective solution for builders and homeowners. Designed to fit standard-size doors and windows, the panels are available in a range of roof pitches and sizes, allowing for excellent design flexibility.

Our pricing has recently been updated to offer a more cost-effective way of constructing with SIPs. To learn more about our updated pricing and how we can assist you, please get in touch with Nishanth at nishanth@sipsindustries.com.au.

MEET THE TEAM – Sam Yaqubi

Introducing **Sam Yaqubi**, our Factory Manager. A carpenter by trade, Sam joined SIPs as a factory hand in 2015. Over the years he has evolved with the company, developing an extensive knowledge of both the fabrication of SIPs and the onsite construction process.

This expertise has enabled Sam to lead the fabrication team with confidence and effectiveness.

Outside of the factory, Sam enjoys keeping fit through his passion for the gym and martial arts.

RECENT PROJECT IN FOCUS: South Perth

It's been a busy 2023 in WA, with construction underway on another stunning two-story SIPs home in South Perth, built by Q Scope Homes. The high-end design blends traditional and modern materials to perfectly match the local style.

Built with SIPs panels for the upper and lower walls and roof, the property boasts excellent energy efficiency and long-lasting comfort. The lightweight timber I-beam floor structure and Hebel floor panels provide a quiet and solid feel underfoot, adding to the home's overall quietness, high performance, and speed.
